The National Center for the Safe Transportation of Children with Special Health Care Needs provides much needed education to help parents keep their children safe.

Who are we?

The National Center for the Safe Transportation of Children with Special Health Care Needs serves as a resource for families, health care professionals, transportation providers, and child passenger safety advocates. The National Center is based at the Automotive Safety Program, which has long been considered a leader in the field of transporting children with special health care needs.

Located at the Indiana University School of Medicine, adjacent to Riley Children's Health, the National Center was established in 2004 to address the unique challenges associated with transporting children with special health care needs.

The National Center for the Safe Transportation of Children with Special Health Care Needs is open Monday – Friday, 8:00 a.m. – 5:00 p.m. EST. To contact the National Center, please call 800-543-6227. To read more about child passenger safety or adaptive transportation, please visit our website at preventinjury.medicine.iu.edu.

Look inside!

This brochure is a poster of the different adaptive child restraints available today.
