

CT Social Story

I am getting a CT today.

I check the rules to know if I can eat, drink, or pee before my test.

I might drink contrast before my test.

The tech tells me
if I need to
change into a
gown.

I take off jewelry.

The tech might
start an IV.

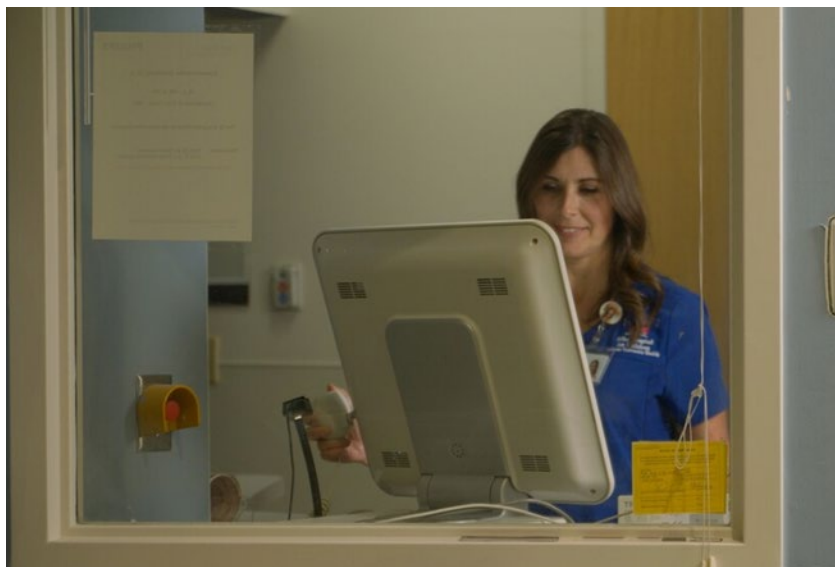

The tech helps me onto the table.

The tech uses straps to help me stay in place.

I can have a support person.

The tech stands behind a window during my test.

The table moves in and out of the scanner.

I stay still for the test.

I can ask
for a break.

All done!
The tech
helps me
off the
table.

All done! I
get dressed
and leave.

My doctor
and I will
talk about
my results
later.

THE END
