

# Ear, Nose, Mouth Exam with Ear Wash

## Social Story

I have an appointment to see my doctor today.

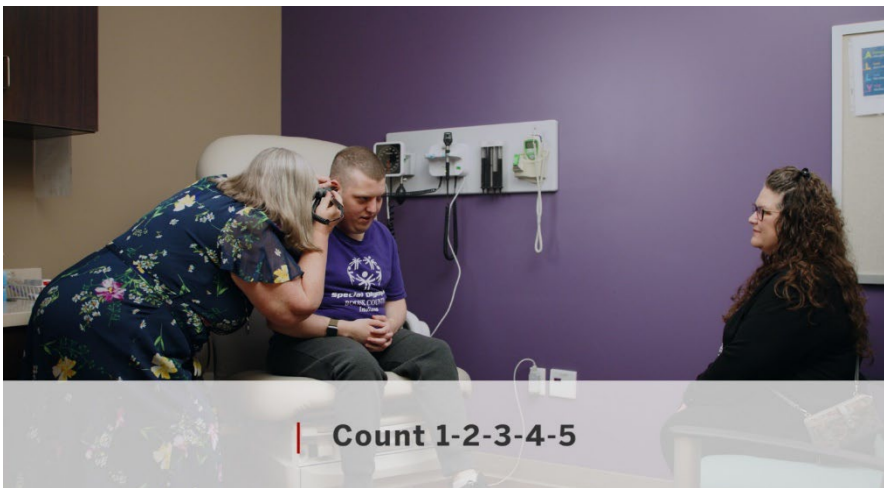

The doctor is going to check my ears, nose and mouth.

I sit on the exam table.

The doctor holds my ear and uses a special flashlight to look inside.

The special flashlight does not hurt. I count to 5 to hold still.

The doctor looks in my nose. I tilt my head back and count to 5.

The doctor looks in my mouth.

I open my mouth wide. The doctor uses a stick to move my tongue out of the way.

The doctor feels my neck with her hands. I sit still.

If I have too much wax in my ear, the nurse or doctor asks if they can wash it out.

The doctor or nurse puts a towel on my shoulder.

I hold a little tub to catch the water.

The nurse or doctor puts a tube in my ear and flushes the wax out.

I can hear better once the wax is out!

THE END
