

Getting Ready for Female Exam Social Story

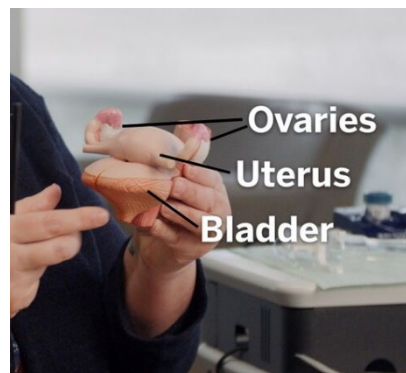

I need an exam of my female private parts.

I learn about good touch, bad touch, necessary touch.

My private parts are the urethra, vagina, uterus, and anus.

**I talk with
a trusted
person
and my
doctor.**

I learn about the tools for my exam.

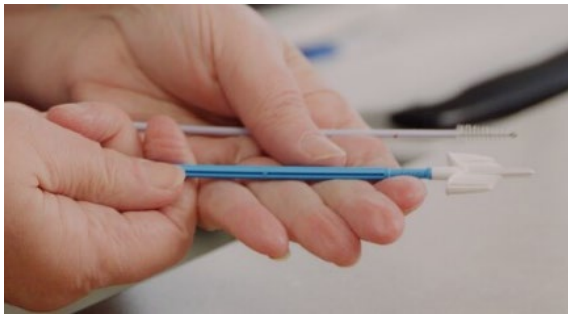

**The exam table has foot
holders for me.**

**A light helps the
doctor see.**

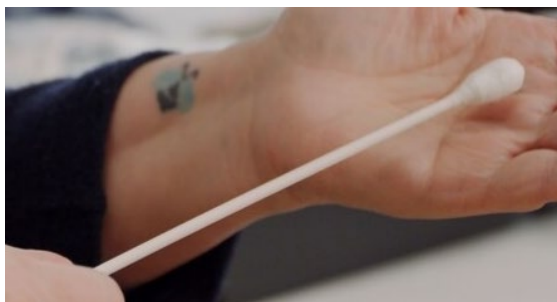

The doctor uses a speculum to look inside my vagina.

The doctor uses brush,

spatula,

and swab.

I can look at the tools before my exam.

I learn to relax my muscles.

I lay on my back with bottoms of feet together.

I let my knees open out and fall down.

I take deep breaths and relax.

Now I am ready to have my exam.

THE END
